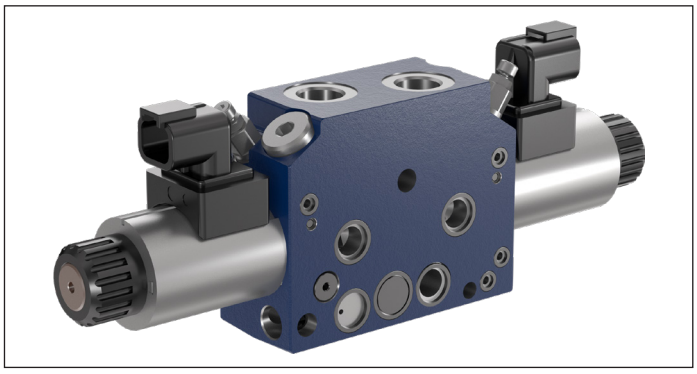
4/3 and 4/2 Proportional directional valve elements with LS

RE 18301-19
Edition: 06.2025
Replaces: 01.2025

EDG-DP
Component Series 1



- Size 6
- Series 1
- Maximum operating pressure*:
  350 bar (5000 psi) on pump side
  350 bar (5000 psi) on consumer side
- Maximum flow at 6 bar (87 psi) 40 l/min (10.6 gpm)
- Ports connections G 3/8 - G 1/2 - SAE6 - SAE8

Note
Spool position sensor available for this valve.
See RE18300-30

General specifications
The inlet section can be configured for either a fixed displacement pump or load-sense variable displacement pump. When simultaneous machine functions are actuated, the pre-compensators will automatically adjust to the highest load pressure via a shuttle arrangement, making the system circuit independent of variations in loads and pump pressures.

Main Field of Application
- Truck mounted applications
- Forestry machinery
- Forklifts and Telehandler
- Municipal vehicles
- Cranes
- Construction machines
- Aerial working platforms
- Heavy duty vehicles
- Agricultural machines

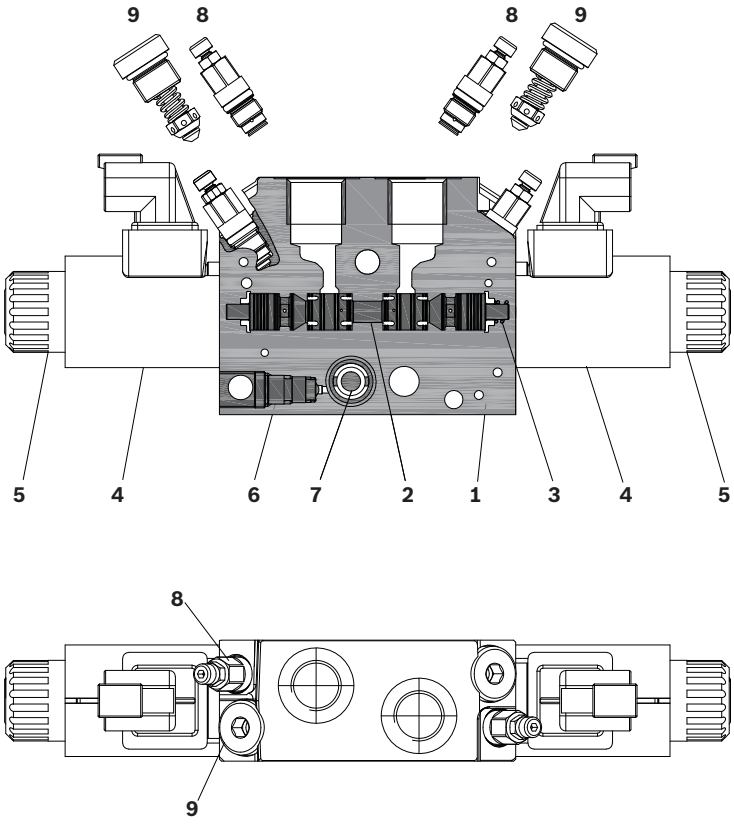
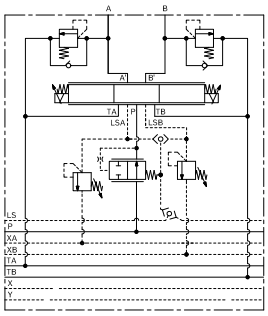
Functional description





1 Housing
2 Main spool
3 Return Spring
4 Coil
5 Ring nut
6 LS shuttle valve
7 Compensator spool
8 LS relief valve (VMGLS)
9 Secondary valve with anticavitation option

The EDG direct acting proportional solenoid sectional valves with pressure compensation control the oil flow to actuators. These elements consist of a stackable housing (**1**) with a control spool (**2**), two solenoids (**4**), two return springs (**3**). Each solenoid (**4**), energized by PWM regulator, displaces the control spool from its neutral-central position “0” proportionally to the current received. When the spool is shifted and the metering notch is open, flow delivery starts and is controlled by a 2 way pressure compensator(**7**) (P > A; P > B).
When the solenoid is de-energized, the return spring pushes the spool back in its neutral-central position.
Each coil (**4**) is fastened to the solenoid tube by the ring nut (**5**). A push-pin manual override is included to actuate the valve without electrical power as needed.

Load pressure compensation
The pressure compensator (**7**) keeps the pressure differential on the main spool (**2**). The flow to the consumers remains constant, despite varying loads.
The highest load pressure on the pump is signaled via the LS line and the integrated shuttle valve (**6**).
Port relief valves with anti-cavitation function on A and B (**9**) protect the system against pressure peaks and cavitation. LS relief valves (**8**), for each consumer port, can be adjusted according to specific application requirements.

Technical data

General		
Valve element with 2 solenoids	kg (lbs)	2.2 (4.85)
Valve element with 1 solenoid	kg (lbs)	1.7 (3.75)
Ambient Temperature	°C (°F)	-30....+90 (-22....+194)
Hydraulic		
Maximum pressure at P, A and B ports	bar (psi)	350 (5000)
Maximum static pressure at T*	bar (psi)	210 (3050) [in case of Emergency Lever option, max. pressure is limited up to 30 bar at T]
Max. regulated flow at 6 bar (87 psi)	l/min (gpm)	40 (10.6)
For E schemes symmetrical spool pattern in neutral position (connection A to T and B to T) E-schemes flow pattern with only meter IN (spool type E_ _ _ I I)in neutral position: the opening area is approx the 50% of nominal cross-section. This spool type is suitable in combination with load holding valves applications.		Approx. 2% of the nominal cross-section
Hydraulic fluid General properties: it must have physical lubricating and chemical properties suitable for use in hydraulic systems.		Mineral oil based hydraulic fluids HL (DIN 51524 part 1). Mineral oil based hydraulic fluids HLP (DIN 51524 part 2). For use of environmentally acceptable fluids (vegetable or polyglycol base) please consult us.
Fluid Temperature	°C (°F)	-30....+100 (-22....+212) (NBR seals)
Permissible degree of fluid contamination		ISO 4572: $\beta_x \geq 75$ X=12...15 ISO 4406: class 20/18/15 NAS 1638: class 9
Viscosity range	mm^2/s	20....380 (optimal 30....46)
Electrical		
Voltage type	PWM	120 Hz
Voltage tolerance (nominal voltage)	%	-10 .... +10
Duty		Continuous, with ambient temperature ≤ 50°C (122°F)
Coil wire temperature not to be exceeded	°C (°F)	180 (356)
Insulation class		H
Compliance with		Low Voltage Directive LVD 73/23/EC (2006/95/EC), 2004/108/EC
Coil weight	kg (lbs)	0.228 (0.503)
Voltage	V	12 24
Nominal 100% current	A	1.76 0.94
Nominal Coil Resistance at 20°C (68°F)	Ω	4.05 13.6

Note
For applications with different specifications consult us.
* In addition to relief valve pressure setting value.

Code	Voltage [V]	Connector type	Coil description	Marking	Coil Mat no.

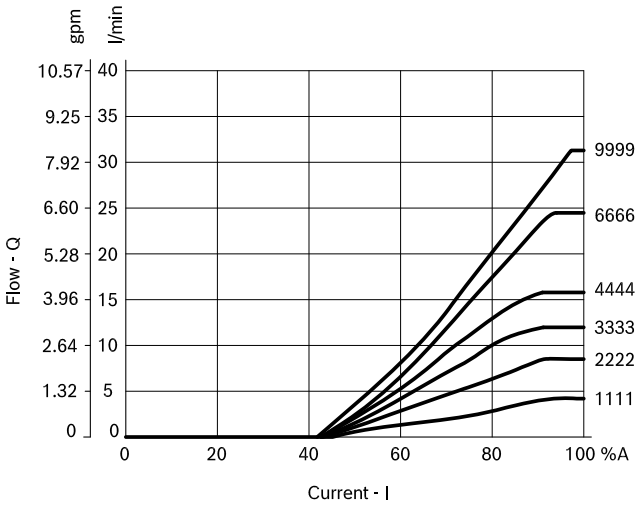
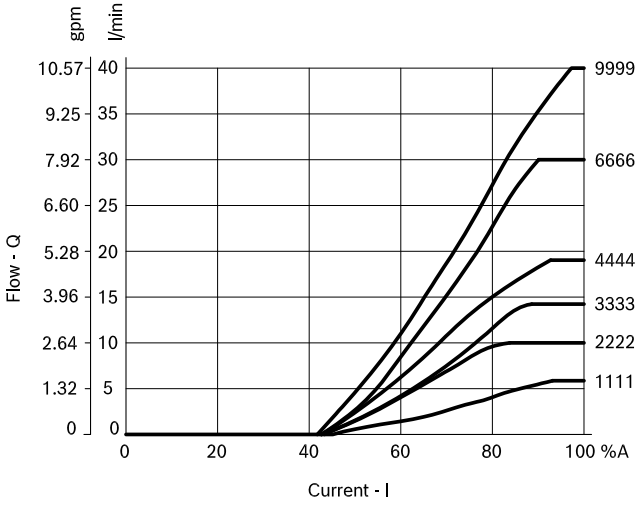
Characteristic curves

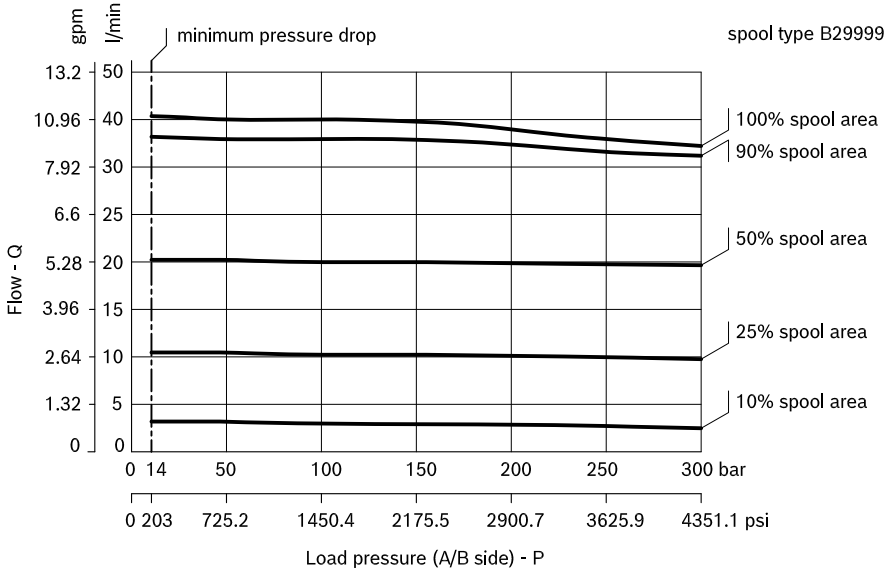
Characteristic curves Q=Q (I) at 4 bar



Characteristic curves Q=Q (I) at 6 bar

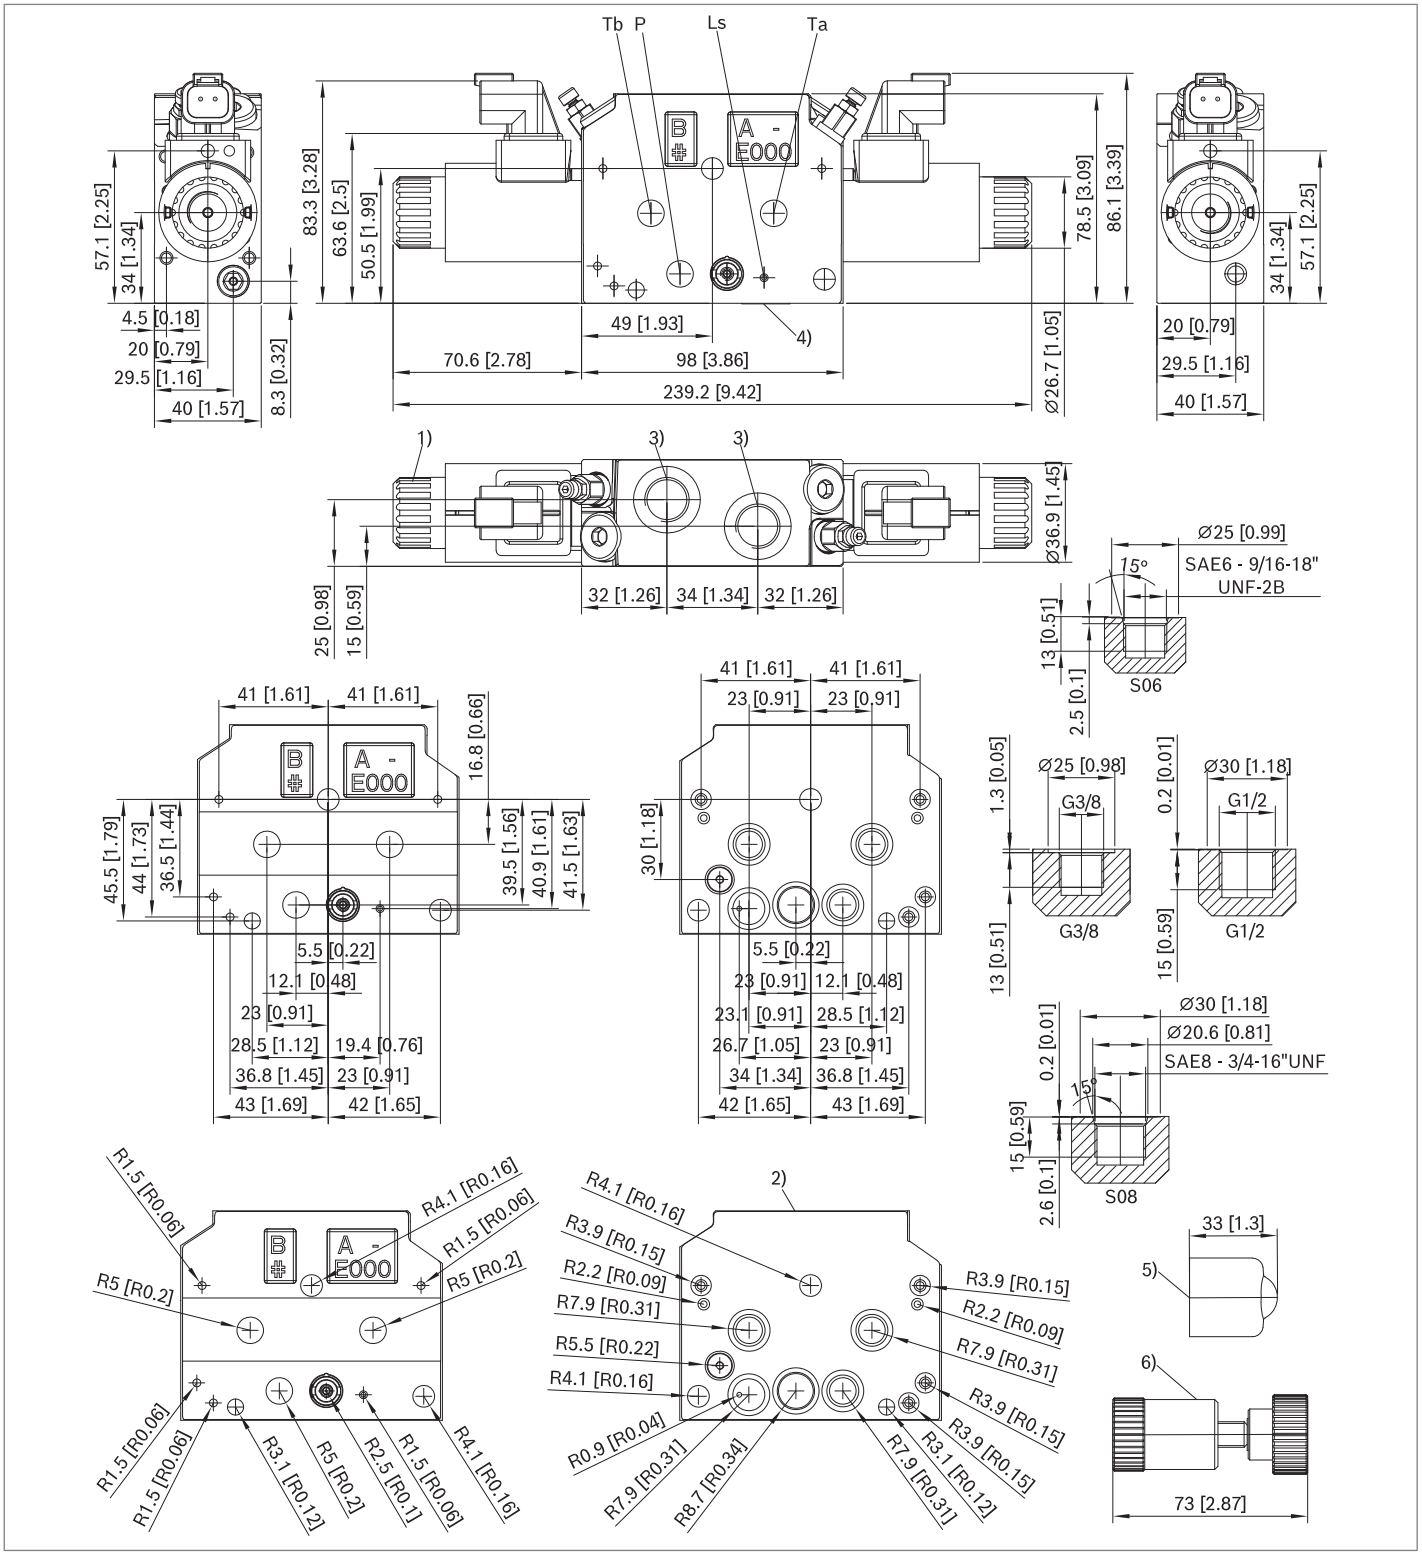


2-way inflow controller



Measured with hydraulic fluid ISO-VG32 at 45° ±5 °C (113° ±9 °F); ambient temperature 20 °C (68 °F).

External dimensions and fittings



1 Ring nut for coil locking (Ø 30.3 mm).
Torque 6 – 7 Nm (4.4 – 5.2 ft-lb).

2 Flange specifications. For tie rod and tightening torque information see data sheet RE 18301-90.

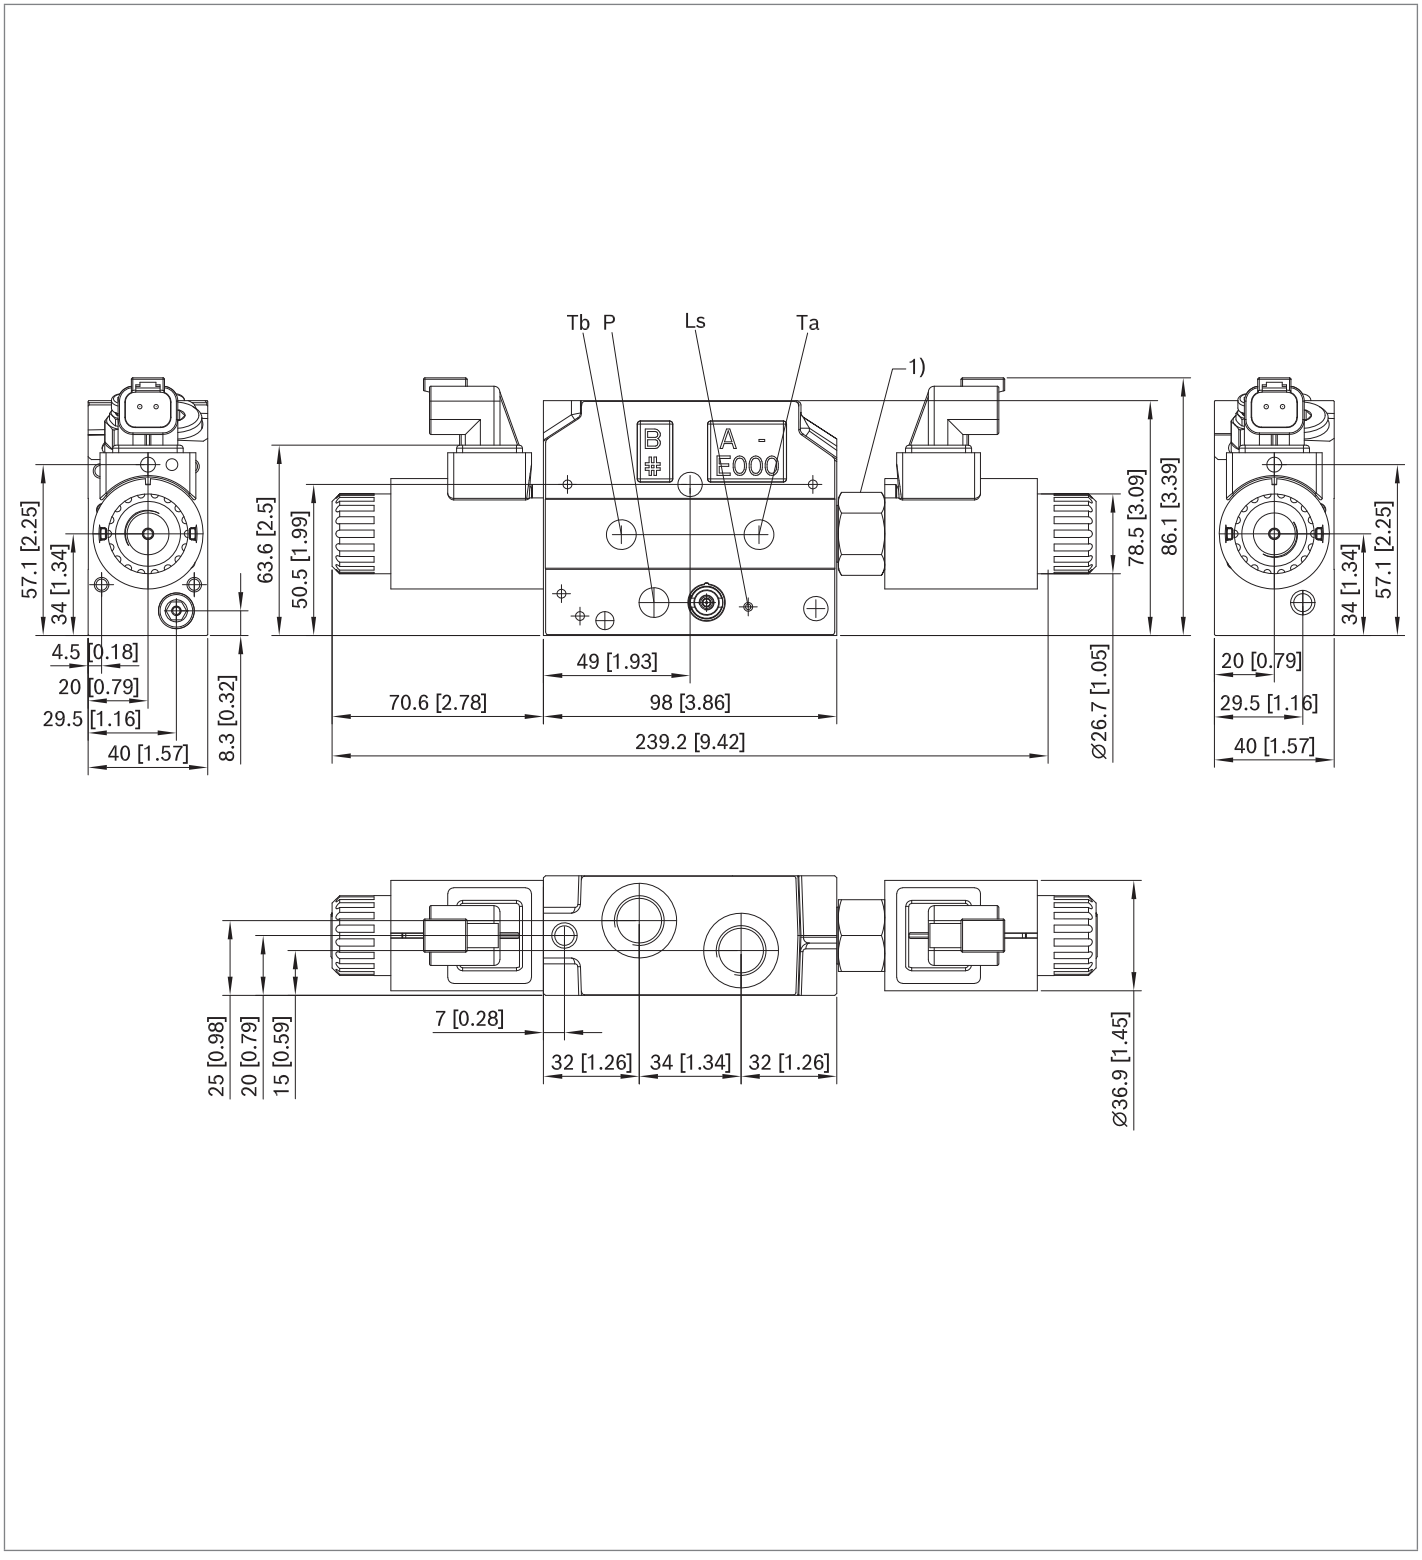
3 A and B ports.

4 Identification label.

5 Optional push-button manual override, EP type, for spool opening: it is pressure stuck to the ring nut for coil locking.
Mat no. R933002705

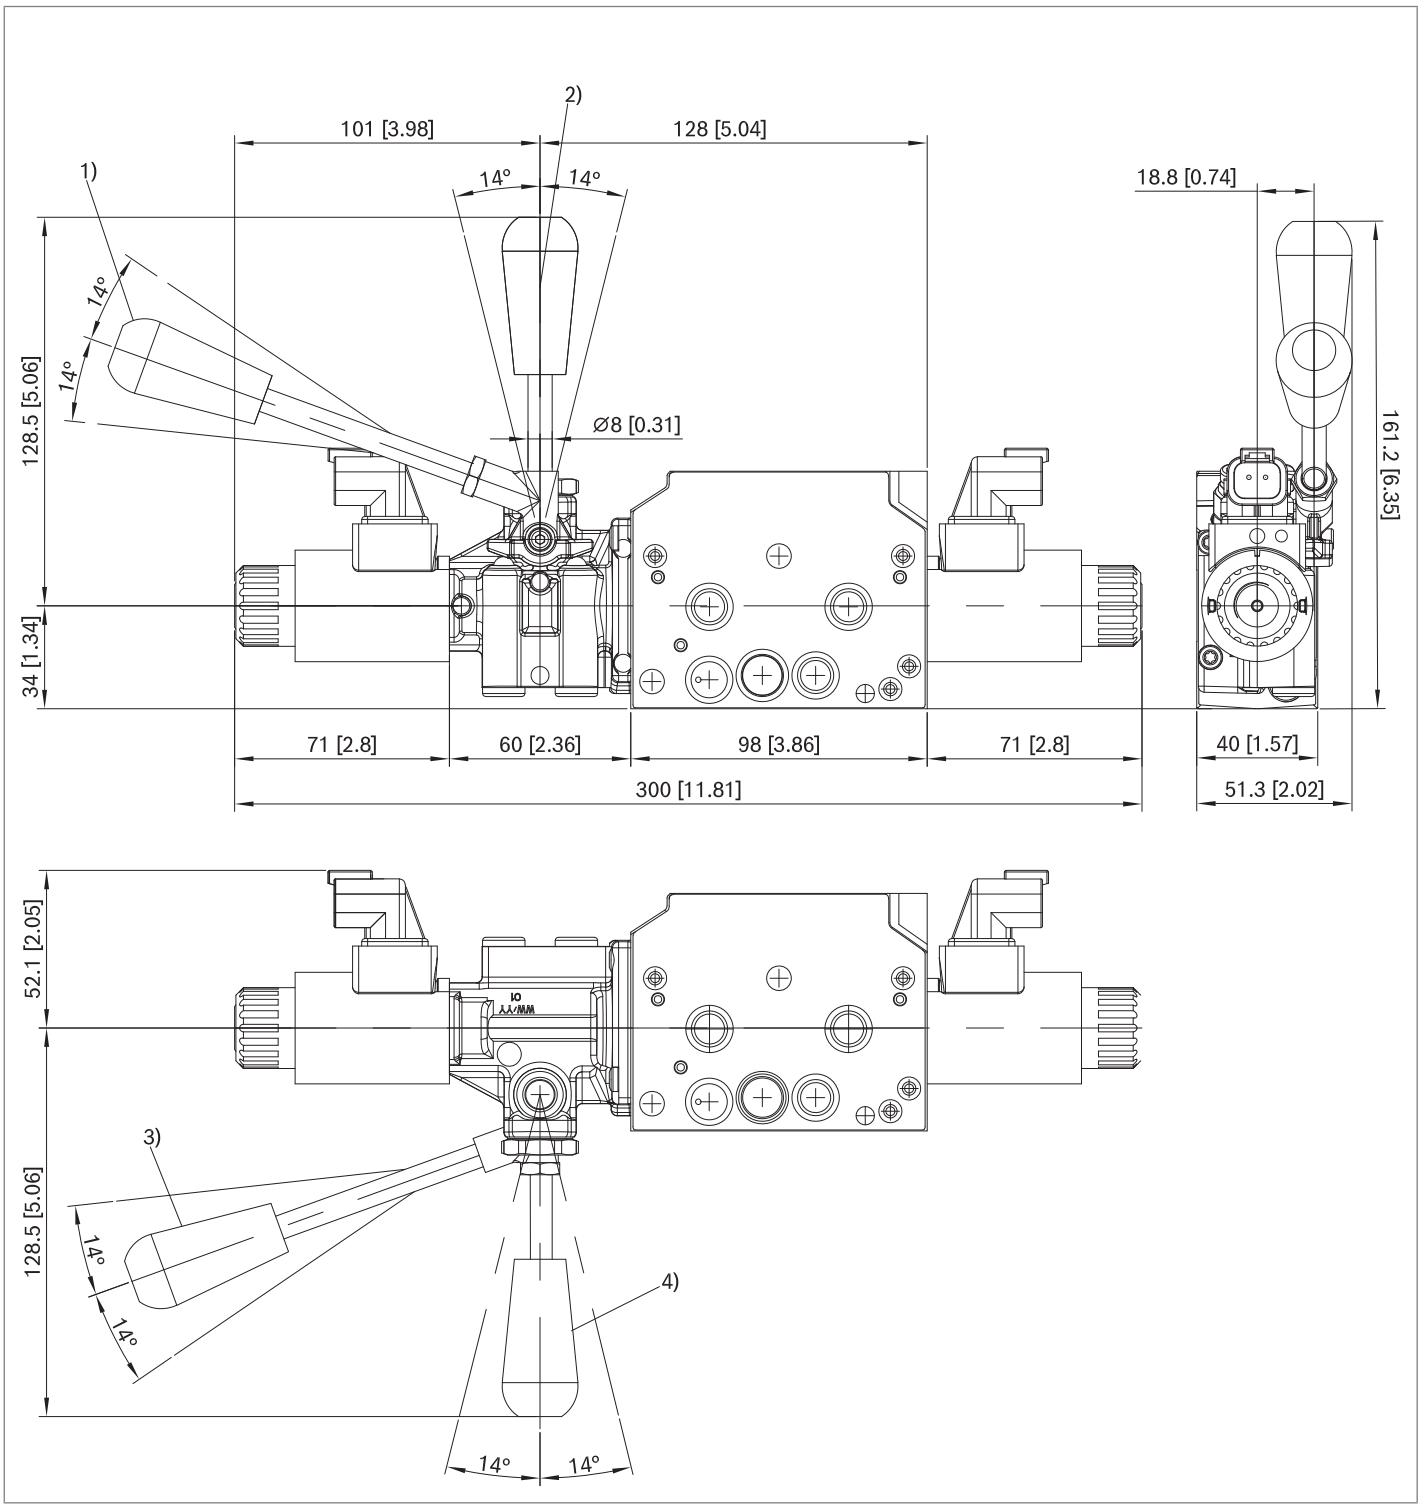
6 Optional screw type manual override, EF type, for spool opening: it is screwed (torque 6-7 Nm (4.4-5.2 ft-lb)) to the tube as replacement of the coil ring nut. Mat no. R930084529.

External dimensions for spool with nominal flow 9



1 Flow-boost system only for spool with nominal flow 9.
It always mounted on "a" side of the valve.

External dimensions with lever

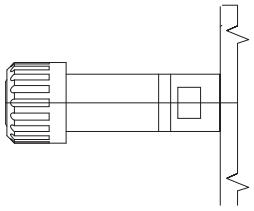


1 Order detail: HA Horizontal lever manual override option
2 Order detail: VA Vertical lever manual override option
3 Order detail: H1 Horizontal lever manual override option, 180° rotated
4 Order detail: V1 Vertical lever manual override option, 180° rotated

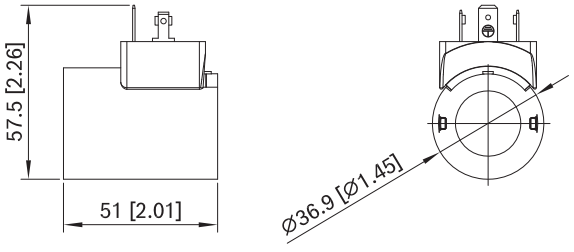
Note
Not possible to switch from HA or VA to H1 or V1 and viceversa.

Electric connections

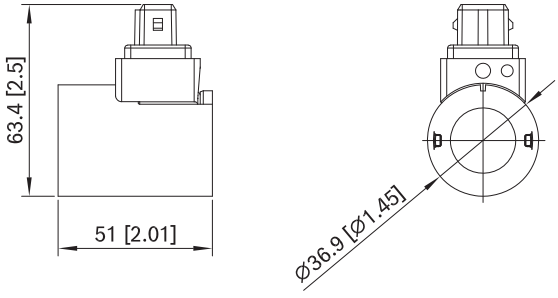
00 Without coil.



01 Protection class: IP 65 when connector with seal is properly screwed down.



03 Protection class: IP 65 with female connector properly fitted (see drawing).



07 Protection class: IP 69 with female connector properly fitted (see drawing).
